Desafio 08 - Item 1/Parte Computacional: $h_a(t)$ analitica vs. amostras $h[n]/T_s = h_a(nT_s)$ ($F_s = 40$ kHz)
(a) $h_a(t)$ e amostras ($T_s = 25\ \mu$s) - detalhe inicial
$h_a(t)$ analitica
amostras $h[n]/T_s = h_a(nT_s)$
$h[0]/T_s = h_a(0^+) = 1$
$h_a(t)$ [1/s]
tempo t [μs]
(b) $h_a(t)$ oscila em $f_d \approx 5999{,}8$ Hz (Q = 60)
$h_a(t)$
envoltória $\pm e^{-\sigma t}$
$h[n]/T_s = h_a(nT_s)$
$h_a(t)$ [1/s]
tempo t [μs]
